

HARISH G

+91-9843233133 — harishganesan123@gmail.com — GitHub — LinkedIn

PROFILE

AI-focused B.Tech. undergraduate with hands-on experience in Machine Learning, Deep Learning, NLP, LLMs, RAG, Computer Vision, Reinforcement Learning, and AI-driven automation. Experienced in developing intelligent applications using Python, FastAPI, React, SQL databases, and modern AI architectures. Currently working as an AI & Data Science Intern at HCL GUVI.

EDUCATION

Amity University, Lucknow

2023–2027

B.Tech. in Artificial Intelligence

CGPA: 8.61/10 — Latest SGPA: 9.20/10

EXPERIENCE

HCL GUVI — AI & Data Science Intern

Mar 2026 – Present

- Contributed to AI and data science initiatives involving AI-powered educational content, automation workflows, and learning solutions.
- Created AI-generated educational videos and technical learning content using AI automation and multimedia tools.
- Coordinated a team of interns, supporting task planning, technical discussions, execution, and delivery.

PROJECTS

AI-Powered GitHub Repository Analyzer & Viva Assistant

GitHub

Python, FastAPI, React, Vite, Tailwind CSS, LLMs, NLP, RAG, SQLAlchemy

- Developed an AI-powered platform that analyzes GitHub repositories and generates project summaries, architecture explanations, folder/file insights, code explanations, and technical learning notes.
- Built an automated repository analysis pipeline to clone and parse repositories, identify key files and project structure, and generate contextual explanations using LLM-powered modules.
- Implemented personalized viva and interview question generation, learning notes, repository insights, JWT authentication, SQLAlchemy backend services, and React-based dashboard/report generation.

CareerPilot AI — AI-Powered Academic & Career Success Platform

Project Materials

React.js, Vite, Tailwind CSS, FastAPI, Python, PostgreSQL, SQLAlchemy, Redis, Celery, AI/NLP

- Developing an AI-powered student platform integrating learning assistance, adaptive study planning, skill-gap analysis, career roadmaps, resume/ATS analysis, internship recommendations, placement readiness, and mock interviews.
- Designed a modular architecture connecting React frontend, FastAPI APIs, PostgreSQL, AI/NLP services, and Redis/Celery for personalized academic and career recommendations.

Solar-Powered Smart Wildlife Water Management System

Project Materials

Solar Energy, ESP32, IoT, Sensors, Predictive Analytics, Machine Learning

- Developing a solar-powered autonomous wildlife watering system combining ESP32-based IoT monitoring, water-level and flow sensing, automated pumping, and environmental monitoring for remote habitats.
- Integrating predictive water-demand analysis to estimate station-level requirements and support intelligent water management through an IoT monitoring workflow.

TECHNICAL SKILLS

Programming	Python, C, HTML, CSS
AI / ML	Machine Learning, Deep Learning, Reinforcement Learning, NLP, Computer Vision, LLMs, RAG, Agentic AI & Architecture
Frameworks	TensorFlow, PyTorch, Pandas, NumPy, Flask, FastAPI, React.js, Vite, Tailwind CSS
Databases	MySQL, PostgreSQL, SQLAlchemy / SQLModel, Redis
Tools	Git, GitHub, Linux, Hugging Face, Celery

CERTIFICATIONS

Reinforcement Learning — HCL GUVI, 2026

Data Analytics & ML for IoT — HCL GUVI, 2026

Data Wrangling & Analysis — HCL GUVI, 2026

Mastering MySQL — HCL GUVI, 2026

AWS AI Practitioner Challenge — Udacity, 2026

Intro. to Data Science with Python — Simplilearn, 2025

ACHIEVEMENTS

- Selected as Subject Matter Expert (SME) — uCertify, through university campus placement process, 2026.
- Technovation 2024 — 3rd Prize, University Level.
- Symphony of Cultures — 2nd Prize, University Level.
